## Version Control

Version	Date	Notes
	February 2008	Initial version.

## Introduction

The User Population Reporting process utilizes various tables and views for the extract and reporting of user population data. The tables reside in two databases:

- TATONKA
- WILDHRSE

## TATONKA Schemas and Tables

### User Population Tables (Schema REG)

TABLE	DESCRIPTION
USERPOP	Registration data for userpop reporting
REG_DUPES_NATL_V REG_DUPES_REGL_V REG_EXPORT REG_RESIDE REG_RESIDE_CD REGION SOURCEDATE USERPOP2A VERSION	Used for reporting or to support special views.

## WILDHRSE Schemas and Tables

### User Population Unduplication Tables (Schema NDWMART)

TABLE	PURPOSE
REG_UNDUP	Registration data from Sandia for userpop unduplication
REG_ETL_LOG	Version information for each userpop extract
INTEGRITY	Integrity ID to be used with unduplication
V_REG_UNDUP	Part of the unduplication process
VERSION	Used to determine next version number
